Providing Australian researchers with competitive advantage through data.

The Australian Research Data Commons is enabled by NCRIS.
Do you want to...

- COLLABORATE with researchers from a range of disciplines.
- INCREASE your research visibility, personal profile and impact.
- FIND data, data solutions and data analysis software and platforms.
- ACCESS national computational resources for research and collaboration through ARDC’s Nectar Research Cloud.
- CONNECT WITH data and skills experts to help solve your data challenges.
- DISCOVER AND PUBLISH national data collections through ARDC’s Research Data Australia portal.
- ANALYSE national and global datasets with ARDC supported user-friendly platforms and virtual laboratories.
- BOOST citations and discovery of your research using identifiers that are unique and persistent.
- FIND data, data solutions and data analysis software and platforms.
- DISCOVER AND PUBLISH national data collections through ARDC’s Research Data Australia portal.

Opportunities

We collaborate with our partners to deliver world-class research infrastructure and increase data skills capability.

Providing you with data, tools, services and resources that accelerate high impact research.
